ABOUT OUR CENTRE

Founded in 1945 to assist patients with tuberculosis, the charity was incorporated by Parliament under the Bermuda Tuberculosis and Health Association Act in 1955. In addition to TB testing, the association operated a pharmacy providing affordable medicines and ostomy supplies. Today the Centre has transformed into the Island's leading cancer organisation providing prevention, early detection, treatment and care services for all.

EQUAL ACCESS

It is our belief that everyone should have access to potentially life-saving early cancer screening and treatment. Through the generosity of our community we are able to provide our services free of co-pays, regardless of whether you have health insurance.

Our Mission - to provide the highest standard of early detection, radiation treatment support, care and education for cancer and other diseases to all.

Our Vision- to serve our community building healthier lives free of cancer and disease.

IMPACT OF THE EQUAL ACCESS FUND

The Centre's **Equal Access Fund** was able to assist approximately **860 individuals** to receive a range of potentially life-saving services at our Centre. Currently, major medical health insurance is the only option that covers 100% of the cost for the majority of clinical services. All other health insurance options fall short, leaving the patient with potentially significant out of pocket expenses on top of their cancer diagnosis. We aim to reduce the worry around how to pay for cancer services so that people are not forced to make choices that may put their health at further risk.

Of the 860 individuals

20%

PREVENTION - SCREENING MAMMOGRAM

Breast cancer is sometimes found after symptoms appear, but many women with breast cancer have no symptoms. It is important that all women 40yrs+ have annual breast cancer screening.

Of the 860 individuals

12%

DETECTION - DIAGNOSTIC MAMMOGRAM, BREAST & PROSTATE BIOPSIES.MAMMOGRAM

A biopsy is done when mammograms or other imaging tests, show an abnormality that may be cancer. A biopsy is the only way to know for sure if it's cancer.

Of the 860 individuals

44%

OTHER DIAGNOSTIC IMAGING - ULTRASOUND AND BONE DENSITOMETRY.

Different tests can be used to look for and diagnose cancer. If there is an area of concern on a screening test (mammogram), additional tests help identify cancer.

Of the 860 individuals

24%

TREATMENT - RADIATION THERAPY

More than half of all people with cancer receive radiation therapy as part of their cancer treatment. Prior to radiation in Bermuda, few uninsured persons were afforded treatment overseas.

MESSAGE FROM THE BOARD PRESIDENT

Judith White

2019 was a year of uncertainty in the healthcare sector with the Government announcing potential sweeping health care reform. This, coupled with our own continued goal of improving our efficiency and positioning ourselves for the future, kept our team busy and focused while continuing to live up to our mission of providing the highest standard of early diagnostic detection, radiation treatment and education for cancer and other diseases.

Bermuda Cancer and Health Centre (the Centre) worked to understand the potential financial impact of the proposed health care reform. Working with industry stakeholders, the Centre began positioning itself to ensure we can continue to provide our services while preparing for change. At the end of 2019 there was no definitive decision as to how health care reform will be achieved.

We continued to strengthen our team by providing training and development opportunities to keep our staff current in their practice. Our clinical affiliation, in radiation therapy (RT), with Dana-Farber / Brigham and Women's Cancer Center (ranked # 4 in USA for adult cancer care) continues to provide opportunities to consult with medical specialists and access to support services, such as specialty consultations, physician lectures, etc.

From a financial perspective and through the generosity of our supporters, the Centre remained financially strong in 2019 with our ability to subsidize access to services for members of our community who do not have health insurance or who are underinsured. Partial funding is provided by our Equal Access Fund.

We continue to advocate for improved cancer control in Bermuda as a means to reduce the cancer burden and improve services for cancer patients and their families. We have begun early collaborative steps with cancer care stakeholders to initiate the undertaking of a National Cancer Control Plan. This will be a public health programme designed to reduce the number of cancer cases and deaths and improve the quality of life of cancer patients.

2020 marks the Centre's 75th anniversary; however, plans to celebrate this occasion have been halted by the Board due to COVID 19. Funds previously allocated to celebrate this event have been cancelled along with other cost cutting actions as we recognize that the negative impact of COVID 19 will be one of the biggest financial challenges facing the Centre. The expectation is that the number of persons uninsured/underinsured will dramatically increase. Our primary goal as we continue through 2020/21 will be to retain our financial stability in order for us to continue to provide diagnostic and radiation therapy services to all Bermuda residents, regardless of their ability to pay.

On closing, our heartfelt thanks and appreciation to all of our supporters, our management team and to all of our staff for their continued support.

MESSAGE FROM OUR CHIEF EXECUTIVE OFFICER

Lynne Woolridge

2019 was a year of engagement, with our employees as well as with external stakeholders. The Centre conducted a series of surveys, seeking feedback from employees, the public, our patient population and the physician community regarding what we do well and where we could improve.

Our staff are our most valuable resources, and we committed to creating meaningful customized training and development, and hosting appreciation events throughout the year. Employee burnout is not uncommon in the healthcare field, and we aim to reduce this as much as possible. The external surveys highlighted the need for multi-pronged forms of promotion and communication, supplementing traditional methods with newer social media.

The addition of the Diagnostic Imaging Clinical Director enabled us to conduct over 14,000 patient appointments. We also made plans to upgrade equipment and to increase our service offerings. We have reached maximum physical capacity in this location, so this will factor into future service considerations.

The Radiation Therapy department continued to demonstrate its value, accommodating 175 patients who might not have been able to receive such treatment. The health profile of Bermuda's population is well documented, and the consequence is being borne out by the number and type of cancers presenting. The staff complement was increased, and a second oncologist recruited to commence employment in 2020.

We are fortunate that our collaboration agreements with Bermuda Hospitals Board (BHB) and Dana-Farber/Brigham and Women's Cancer Center (DF/BWCC) remain intact. More than ever, not-for-profits rely on collaboration and partnerships for continued success.

The Government of Bermuda desires to provide affordable quality healthcare to its citizens. When the Bermuda Health Plan was announced, the Centre undertook consultation with the Bermuda Health Council and other stakeholders to evaluate its role within the planned reform. The Centre operates from the premise that everyone should have access to potentially life-saving early cancer screening and treatment. Our Equal Access Fund enables uninsured and underinsured persons to avail themselves of our services, and we will work to ensure that we can continue to deliver on our mission.

We continue to be grateful to the community of staff, volunteers, donors and our Board of Directors, who support us in this endeavour.

CANCER PREVENTION

Research shows that up to 50% of cancer cases and about 50% of cancer deaths are preventable with the knowledge we have today. Prevention and early detection are more important than ever – and are proven, effective strategies to lower health care costs.

Lifestyle choices such as refraining from using tobacco products, being physically active, eating a nutritious diet, practising sun safety, receiving recommended immunisations, practising safer sex and knowing family medical history can dramatically improve health outcomes.

OUTREACH PROGRAMMES

The Centre's educational presentations and workshops tackle a range of topics: SunSmart (skin cancer), LungSmart (lung cancer), Know Your Lemons (breast cancer), The Silent Killer: Prostate Cancer in the African American Community and Reduce Your Risk (daily lifestyle choices). All programmes and workshops are provided to the public at no cost, and can be requested by corporate and community groups.

DIAGNOSTIC IMAGING

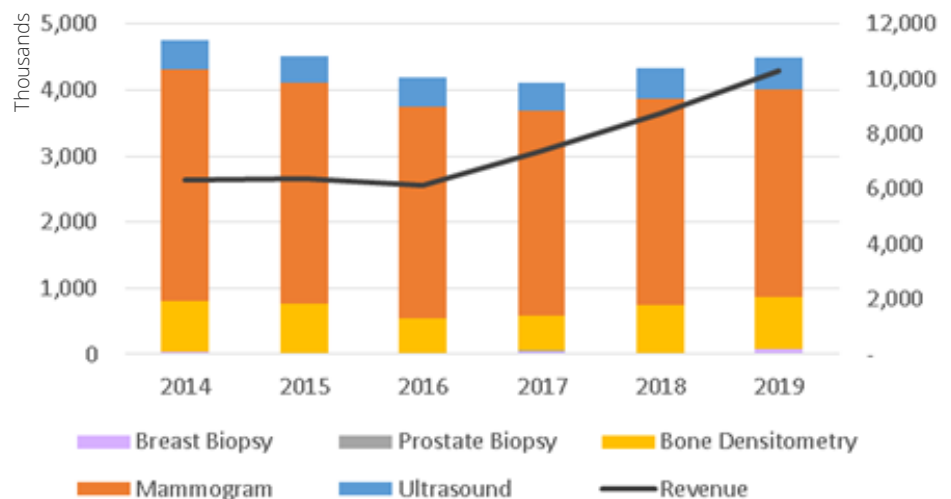

The Bermuda National Tumour Registry reports that 300+ people are diagnosed with cancer every year, and 80 people a year die from cancer.

Working with the latest in technology, the Centre's diagnostic imaging team includes radiologists, technologists and other healthcare professionals who use information from imaging tests and biopsies to identify the type and location of cancer and determine the stage (extent) of the disease. The Centre is Bermuda's leading mammography facility providing a specialist approach to breast health from screening through diagnosis. In partnership with the Bermuda Hospitals Board, the Centre also promotes prostate health by providing consultations and biopsies aiding men who do not have health insurance.

Diagnostic imaging services include: 3D mammography, ultrasound, breast and prostate biopsies and bone densitometry.

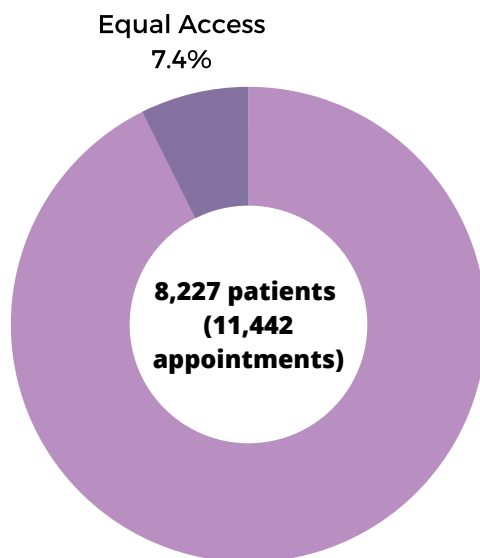

PATIENT VOLUME BY MODALITY

EARLY DETECTION

Finding cancer at an early stage can save lives. Cancer that is diagnosed at an early stage, when it isn't too large and has not spread, is more likely to be treated successfully. Donations made to our Equal Access fund help ensure that people regardless of their level of health insurance do not put off potentially life-saving screening and diagnostic appointments.

654 patients were assisted by the Equal Access Fund. \$100,744 subsidised underinsured persons and \$93,270 subsidised uninsured.*

*patients returning for multiple appointments are only counted once

Patient count represents the number of patients who received care at the Centre during the 2019 calendar year, associated dollar values are exclusive of accounting adjustments required for revenue recognition and matching.

RADIATION THERAPY TREATMENT

Our American College of Radiology (ACR) accredited Radiation Therapy Unit can treat 95% of cancers where radiation is recommended. Our state-of-the-art, purpose built radiation therapy unit is staffed by highly qualified and experienced radiation oncologists, therapists, nurses and physicists.

Radiation Therapy Team

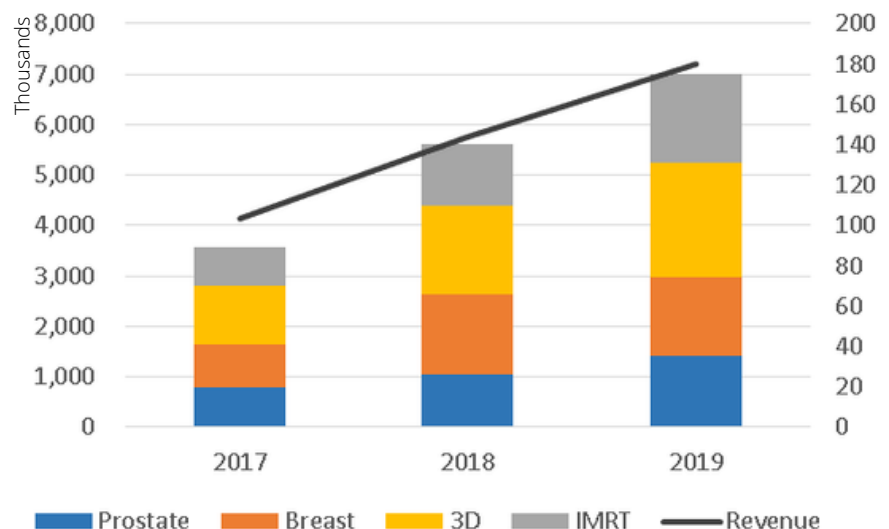

CLINICAL AFFILIATION

Our clinical affiliation with the #4 ranked US hospital for adult cancer care Dana-Farber/Brigham and Women’s Cancer Center (DF/BWCC) ensures that our RT unit provides the same level of treatment, care and outcomes at international standards, by using the same treatment systems, software, RT protocols, and quality assurance programmes that are utilised at DF/BWCC.

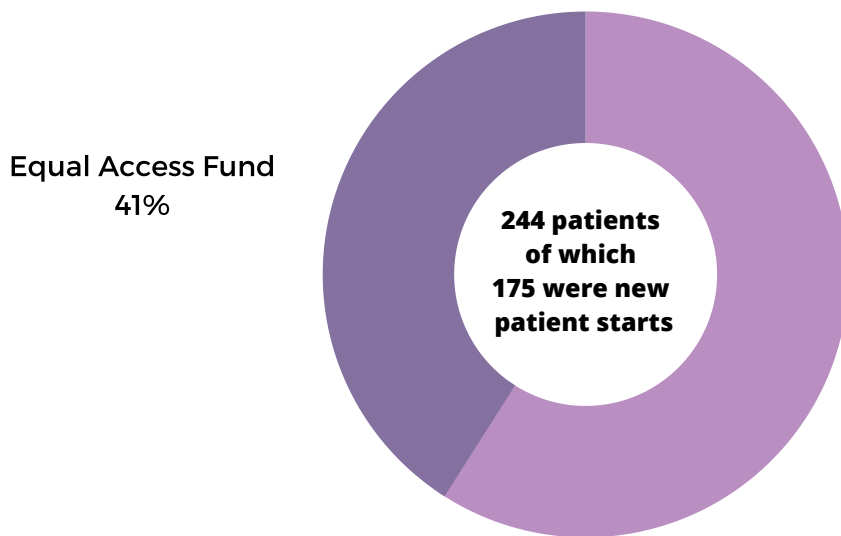

State-of-the-art True Beam™ Linear Accelerator

TREATMENT STARTS BY DELIVERY

AFFORDING TREATMENT

According to the National Cancer Institute, when a loved one develops cancer, the family's risk of significant financial hardship becomes startlingly high. At the Centre, we believe that patients should be focused on recovery, not the stress and worry of how to pay for treatment. And thanks to our community who donate to the Equal Access Fund, the Centre is in a position to assist patients in reducing the burden of paying for radiation therapy.

“

100 patients were assisted by the Equal Access Fund. \$1,386,736 subsidised underinsured persons and \$39,746 subsidised uninsured.*

*patients returning for multiple treatments are only counted once

”

Patient count represents the number of patients who received care at the Centre during the 2019 calendar year, associated dollar values are exclusive of accounting adjustments required for revenue recognition and matching.

COMMUNITY OUTREACH

1 in 3 people will develop cancer in their lifetime. Free programmes are provided, raising awareness that many cancers are preventable through healthy lifestyle choices, medical screenings, and through early detection when treatment is more likely to be successful.

REDUCE YOUR RISK

One of the most overlooked components of cancer prevention is the impact of lifestyle choices. It is essential for the Centre to share valuable information and keep it simple so that people take action. Our programme is designed to open lines of dialogue for people to learn and ask questions. Reach - 36 people, 3 presentations over 2 months.

SUNSMART

Teaching Bermuda's youth and their carers sun safe behaviour to prevent skin cancers - presented in government and private schools reaching children 4-16yrs. Reached 2,186 children. The SunSmart Accreditation programme aims to provide those caring for Bermuda's youth during peak UV periods with the tools and understanding to prevent overexposure. Reach - 27 summer camps participated with 100% pass.

KNOW YOUR LEMONS

A Worldwide Breast Cancer programme, launched in Bermuda in October 2019 the programme uses a clever image of 12 lemons in an egg carton to represent the signs of breast cancer and makes it easy for everyone, no matter their level of literacy to visualise what to look and feel for without needing to read. "Know Your Lemons". Reach - 24 women, 36 people total, over 3 presentations in 1 month.

MEN'S HEALTH

Developed to extend health care access and information to men without health insurance (but open to all men), the programme utilises a free one day health clinic with 13+ health screening services available from dental and diet to prostate and skin. A free film with Q&A, depicting a powerful journey through prostate cancer, is also utilised to share information. Reach - 190 attended the men's health screening and 64 attended the film.

LUNGSMART

Presented in collaboration with Open Airways - targeting children ages 10-12yrs through the school system. Interactive presentations on the dangers of cigarettes and tobacco use so that they can make informed decisions. Reach - 147 students, 4 presentations, 3 schools.

VOLUNTEERISM

We are grateful to all our volunteers who provided approximately 1,637 hours, a value of \$41,629,* to support our mission to provide the highest standard of early detection, radiation treatment support, care and education for cancer and other diseases to all.

Volunteering is the ultimate exercise in democracy. You vote in elections once a year, but when you volunteer, you vote every day about the kind of community you want to live in".

The benefits of volunteer work reach far and wide with a ripple effect that begins with the individual, then our Centre and extends beyond into the community, benefitting everyone in its wake.

Our volunteers are a large part of our event success; without their time, talents and engagement, we would not have the ability to connect and support our community. Volunteers also play essential roles within our Centre, assisting with administrative tasks, and work as brand ambassadors for the Centre.

*2020 value of a volunteer hour is \$25.43, as per the Independent Sector.

Relay For Life of Bermuda Volunteer Event Committee

BF&M Breast Cancer Walk

MObember Bermuda

FUNDRAISING SUPPORT

83% of funds donated to the Centre are raised through our fundraising events. Thank you to those who participate in and sponsor our events, and to all those who support friends through peer-to-peer fundraising.

ST. BALDRICK'S FOUNDATION GRANT

Organised by a volunteer committee working directly with the St. Baldrick's Foundation, the local events provide residents with a means to directly support overseas children's cancer research. The St. Baldrick's Foundation provided an annual grant of \$48,000, in support of the Centre's SunSmart Programme, which has the ultimate long term goal to reduce the incidence of skin cancer by teaching proactive sun-safe behaviours to the Island's youth.

RELAY FOR LIFE OF BERMUDA

The sixth annual 24-hour event was a true celebration of survivorship, remembrance of those no longer with us and a rallying call to fight back against cancer. Relay raised \$680,956 gross with 115 teams, 130 volunteers, 365 registered survivors and numerous event sponsors led by Liberty Specialty Markets. All funds raised support the Centre's Equal Access Fund.

BREAST CANCER AWARENESS MONTH

October is filled with events raising awareness of the disease, which affects 1 in 8 women. Together, the BF&M Breast Cancer Awareness Walk, Wear it PINK Denim Day and Girls Night In Events and a host of third party events reach thousands of women and their families raised over \$173,145 gross towards awareness and providing equal access to mammograms and radiation therapy.

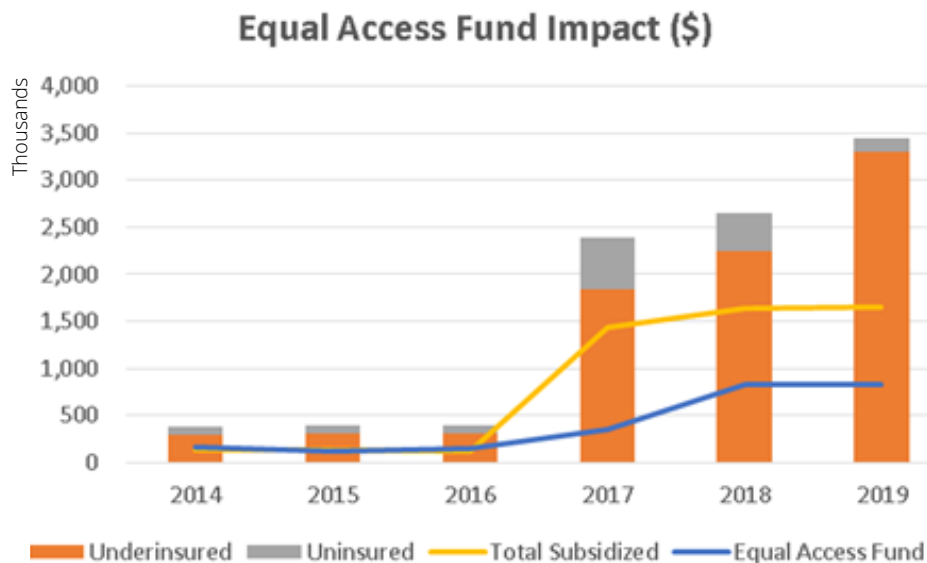

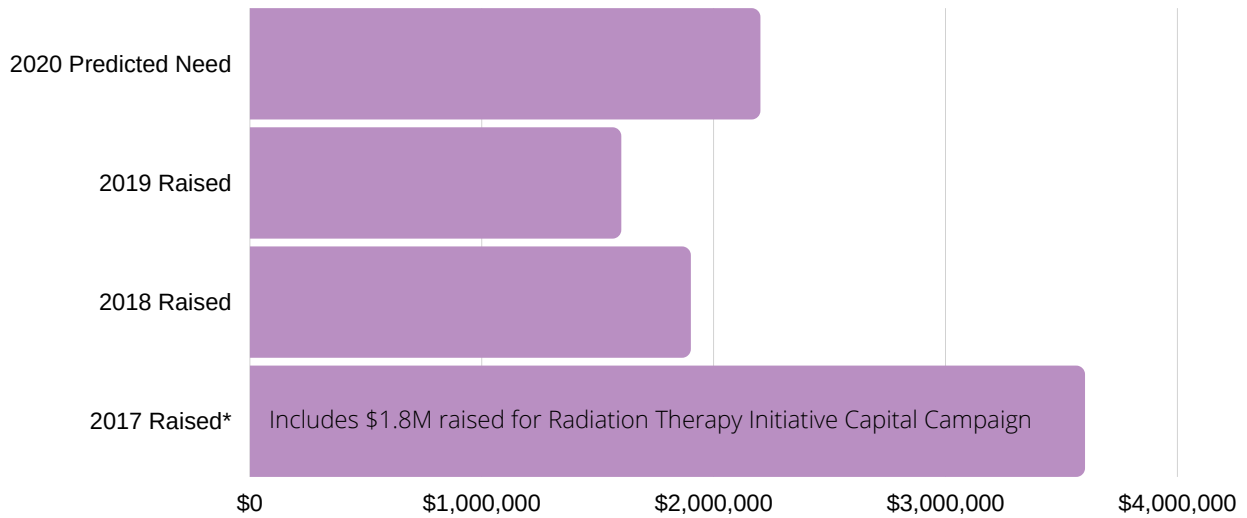

MEN'S HEALTH MONTH

Raised \$93,639 gross, specifically to support health initiatives for men on Island. The AXA Man on the Run 5K and MOvermber.bm continue to raise funds and increase awareness of the signs, symptoms and risk factors for prostate cancer and other diseases.

YOUR ONGOING SUPPORT

Cancer is unpredictable making it challenging to anticipate the fundraising needs of the Centre: diagnostic pathways, number of cancers diagnosed, type of cancer, staging of cancer, classification of tumours, patient's health insurance coverage or lack thereof. Each one of these can drastically impact the cost of cancer care.

We are dedicated to using every donor dollar wisely to fund and provide equal access to our critical programmes and services which people count on daily.

FINANCIAL REPORT 2019

Chief Financial Officer

The 2019 audited financial statements present a strong financial year for the Centre, with net earnings of \$2.7m or 65% in excess of the prior year and net assets up by \$2.8m (73%). Both clinical departments experienced growth in patient volumes resulting in a combined revenue increase of 22% over 2018.

Opening in May 2017 and now in its second full year of operation, the Centre's Radiation Therapy unit provided radiation treatment services generating 25% more revenue, due primarily to an increase in the volume of new patient starts, compared to the prior year. It is worth noting that the volume of new patient starts is 46% higher compared to its first year and almost 75% above the original per annum referral estimates.

The Centre's Diagnostic Imaging department experienced an overall increase of 17% in revenues over 2018. Whereas the prior year increases were primarily attributable to higher Standard Health Benefit rates, the 2019 increases resulted from the addition of the onsite Radiologist who provided clarity and formalized guidance over criteria for the Centre's application of 3D breast imaging protocol.

Annual expenditures grew only 8.5% as the Centre faced resource challenges to adequately staff and support the demand in services. The value of donated services to uninsured and underinsured patients decreased 7% suggesting that more patients were covered by some form of insurance in 2019, or there was some level of pent up demand for radiation therapy in the unit's initial year.

Benefitting from Relay-For-Life fundraising proceeds, the Equal Access Fund was able to cover 48% of the unrecoverable value of services to the uninsured and underinsured for 2019 (vs 45 % in 2018 and 35% in 2017). Note, however, that in 2017, Relay-For-Life proceeds were directed towards the capital campaign for construction of the Radiation Therapy unit.

Cash from operations allowed the Centre to repay in full the \$1.5m outstanding bank loan by the end of the first quarter, to complete upper floor renovations by the end of Q3 and to contribute to a newly established equipment replacement reserve by yearend.

In the face of the unknown and long-term economic impact of the current global pandemic and local health finance reforms, the Centre's healthy cash balances and reserves at yearend serve as a comforting but threatened buffer against immediate and future financial challenges.

SENIOR MANAGEMENT TEAM

At Bermuda Cancer and Health Centre, patient and community care is a team effort. Our team combines the skills and experience of several healthcare and business professionals, many of whom specialise in diagnosing and treating cancer. The senior management team works closely with the board of directors and the Centre's clinical managers planning and directing the work of the Centre.
